Assistance with Data Migrations

Training in Microsoft Access, SQL, PL/SQL, VBA

Website Design

I have a wide range of technical abilities, if there is something you require that is not listed above please contact me to see if I can offer the service. I am Fully Insured and CRB Checked in April 2012.

Since 1989 I have worked primarily in College MIS departments, originally starting work as a Data Clerk, then progressing through to a Data Analyst / Oracle Database Administrator.

Since 2002 I have worked as a Senior Business Consultant for a large organisation which provided MIS Software and a variety of MIS services, primarily for the Adult and Further Education Sector, until June 2008 where I decided to become a freelance consultant.

I have developed management level reports including KPI's, applications that integrate with MIS systems to improve efficiency and I have also extracted and analysed data for various MIS systems such as EBS, Unit-E and QLS.

Resources Available:

I am personally available either on-site or remotely to perform a variety of services. I also work closely with other highly experienced consultants to enable us to provide a complete MIS solution including MIS Management, ILR Returns (including HE/ESF/WBL) and Report Writing.
